

DILARA DAMAR

I am a dedicated computer science student with solid knowledge of C# and hands-on experience in XR development using Unity. My passion lies in developing complex software solutions and continuously advancing my skills in emerging technologies. Through various projects, I have gained extensive insights into both front-end and back-end development and look forward to taking on responsibility in client projects while expanding my expertise in .NET development. Teamwork, reliability, and a customer-oriented approach are second nature to me.

CONTACT ME
